01 · CAREER

Roles that bridge advisory and ownership.

2025 – PRESENT

Granum · SaaS CRMs for Green Industry

AI Data Cloud Architect · Snowflake · dbt · Cortex

In-house platform architecture for the green-industry SaaS company behind LMN, SingleOps and Greenius: governed ingestion, bronze-silver-gold warehousing, stored-procedure ETL/ELT moved onto dbt with CI/CD and data-quality gates, and dbt data pipeline transformation. Also building AI Data Insight, a GenAI chat agent that lets operators ask about their numbers in plain language — jobs, crews, revenue and job costing — with answers grounded in trusted warehouse metrics rather than ad-hoc reports.

2024 – 2025

Rearc • Fortune 100 FinServ Consultancy

Cloud Data Architect • Lead Data Engineer • Tech Presales

Financial-services consultancy serving organizations including Goldman Sachs, Mastercard, Bloomberg and State Street. Built a real-estate GenAI chat agent on AWS Bedrock and the ChatGPT platform, and a SIEM security platform on Databricks.

2021 – 2024

NorthBay Solutions International

Snowflake Practice Director • Principal Solution Architect

Built and led an AWS-Snowflake practice, shaped pursuits, advised executives and remained hands-on through platform delivery.

2021

Cognizant IT Strategy

Associate Director • Enterprise Architecture Advisory

Enterprise cloud, data-platform and architecture advisory across complex client environments.

2020 – 2021

Saks Fifth Avenue • Saks OFF 5TH • Hudson's Bay Company

Director • Enterprise Architect, Cloud Data Platforms

Owned platform direction and data innovation while helping lead a three-data-centre exit to AWS and Snowflake.

2017 – 2020

Deloitte • Omnia AI founding member

Senior Manager • Enterprise Solution Architect

Cloud, data, AI and integration programs; alliance building, technical enablement and executive advisory.

2000 – 2017

Capgemini • formerly Ernst & Young Consulting

Consulting Manager • Enterprise Architect • PMP

Architecture and delivery leadership across financial services, insurance, automotive, manufacturing, retail and utilities.

1998 – 1999

IBM Toronto Lab

Software Research & Development

Early-career product engineering and software R&D on VisualAge for Java IDE: product development testing and NLS internationalization.

02 • PORTFOLIO

Selected programs and initiatives.

RETAIL • CLOUD MODERNIZATION

Three data centres to AWS and Snowflake

Led data conversion delivery for a North American multi-banner retailer: 260 TB, 30+ databases, ~3,000 pipelines, ~4,000 reports and 20+ applications moved in an eight-month window.

MANUFACTURING • SAP

Petabyte-scale conversion across 30+ plants

Led data migration design and delivery across a five-year, three-country SAP program, reconciling hundreds of source feeds per plant and approximately two petabytes of data.

SCHNEIDER ELECTRIC

SAP

US • CANADA • INDIA

HEALTHTECH • SAAS

Multi-tenant data products across AWS, Snowflake and Azure

Architecture, customer-success delivery and hands-on engineering for HIPAA-aware SaaS products, serverless analytics and cross-cloud data integration over multiple releases.

INOVALON

AWS • SNOWFLAKE

PRODUCT DELIVERY

APPLIED AI • PRODUCT

Generative AI from proposal through productization

Designed and delivered customer-journey and persona-driven solutions using AWS Bedrock, RAG, LangChain and OpenAI models, with executive stakeholders involved from pilot framing through testing.
